**Distinguishing Characteristics**

- **Value Driven** - Search for leading companies selling at a discount to their fair value.
- **Quality Focused** - Emphasize companies with solid balance sheets and strong free cash flow capabilities.
- **Style Pure** - Strictly adhere to buy and sell discipline to ensure consistent value-oriented portfolio.
- **Lower Volatility** - Identify and buy companies with a higher probability of modest outperformance rather than a lower probability of high outperformance.
- **Client Centric** - We always put our clients first and adhere to strategy capacity and liquidity constraints.

†Not examined by the Independent Verifiers.

\* Dispersion is not presented for this period as there were five or fewer accounts active for the full year or period is less than one year.

Dean Capital Management, LLC (DCM) is an independent investment advisor registered with the SEC. DCM is an affiliate of C.H. Dean, LLC and manages a variety of equity and fixed income assets for institutional and individual investors. DCM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. DCM has been independently verified for the periods from July 1, 2008 to December 31, 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Small Cap Value composite has had a performance examination for the periods July 1, 2008 to December 31, 2022. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Past performance does not guarantee future results. Performance subsequent to 2/29/24 represents preliminary performance results. Preliminary data is not subject to the error correction policy.

The composite calculations include all investment advisory accounts of the Small Cap Value Composite (the Composite) managed by DCM on a fully discretionary basis. The objective of the Small Cap Value Composite is superior capital appreciation. The Small Cap Value style uses value-oriented equities with market capitalizations primarily less than \$4 billion at purchase. This style is a fully invested equity style which ranges from 90%-100% equity, and the number of holdings typically ranges between 60 and 80. The remainder of the portfolios is typically invested in short term U.S. Treasury Bills or other cash equivalents. A portfolio must have a minimum of \$80,000 for inclusion in the Composite. The inception and creation of the Composite was July 1, 2008. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy.

The investment performance statistics were calculated without provision for income taxes, present results with all dividend and interest income reinvested and are stated in U.S. Dollar terms. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The dispersion of annual returns is measured by the standard deviation across asset-weighted gross of fee returns represented within the Composite for a full year. Leverage is not used in any portfolio in this composite.

Gross of fee returns are presented before management and certain custodial fees, but after all trading expenses except where commissions have been waived. Net returns are presented net of any investment management fees and custody fees and reflect the deduction of a model fee equivalent to the highest applicable advisory fee. All returns are net of execution costs and exclude the effect of any income taxes. A representative asset based annual investment management fee schedule for this Composite is as follows: 0.80% on the first \$10,000,000; 0.70% on the next \$15,000,000; 0.60% over \$25,000,000.

The benchmark is the Russell 2000 Value Index, which is not available for direct investment. The Russell 2000 Index measures performance of the small-cap segment of the market and includes approximately 2000 securities based on a combination of their market cap and current index membership. The Russell 2000 represents approximately 7% of the Russell 3000 total market capitalization. The Russell 2000 Value Index measures the performance of those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth values. These stock indexes assume reinvestment of dividends and capital gains, and assume no management, custody, transaction or other expenses.
