Distinguishing Characteristics

- **Value Driven** - Search for leading dividend paying companies selling at a discount to their fair value.
- **Quality Focused** - Emphasize companies with solid balance sheets and strong free cash flow capabilities.
- **Style Pure** - Strictly adhere to buy and sell discipline to ensure consistent value-oriented portfolio.
- **Lower Volatility** - Identify and buy companies with a higher probability of modest outperformance rather than a lower probability of high outperformance.
- **Yield Emphasis** - Seek companies with the most desirable combination of high, safe and growing dividends.

†Not examined by the Independent Verifiers.

Dean Capital Management, LLC (DCM) is an independent investment advisor registered with the SEC. DCM is an affiliate of C.H. Dean, LLC and manages a variety of equity and fixed income assets for institutional and individual investors. DCM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. DCM has been independently verified for the periods from July 1, 2008 to December 31, 2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Equity Income composite has had a performance examination for the periods January 1, 2011 to December 31, 2023. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Past performance does not guarantee future results. Performance subsequent to 5/31/24 represents preliminary performance results. Preliminary data is not subject to the error correction policy.

The composite calculations include all investment advisory accounts of the Equity Income Composite (the Composite) managed by DCM on a fully discretionary basis. The objective of the Equity Income Composite is capital appreciation with an income focus. The Equity Income style is a fully invested style of large, mid, and small cap stocks which ranges from 90%-100% equity, and the number of holdings typically ranges between 40 and 60. The remainder of the portfolios is typically invested in short term U.S. Treasury Bills or other cash equivalents. A portfolio must have a minimum of \$80,000 for inclusion in the Composite. The inception and creation of the Composite was January 1, 2011. A list of all composite and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The type of portfolios in which each strategy is available (segregated account, limited distribution pooled fund, or broad distribution pooled fund) is indicated in the description of each strategy.

The investment performance statistics were calculated without provision for income taxes, present results with all dividend and interest income reinvested and are stated in U.S. Dollar terms. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The dispersion of annual returns is measured by the standard deviation across asset-weighted gross of fee returns represented within the Composite for a full year. Leverage is not used in any portfolio in this composite.

Gross of fee returns are presented before management and certain custodial fees, but after all trading expenses except where commissions have been waived. Net returns are presented net of any investment management fees and custody fees and reflect the deduction of a model fee equivalent to the highest applicable advisory fee. All returns are net of execution costs and exclude the effect of any income taxes. A representative asset based annual investment management fee schedule for this Composite is as follows: 0.60% on the first \$10,000,000; 0.50% on the next \$15,000,000; 0.40% over \$25,000,000.

The benchmark is the Russell 1000 Value Index, which is not available for direct investment. The Russell 1000 Value Index measures the performance of the 1,000 largest U.S. companies based on total market capitalization with lower price-to-book ratios and lower forecasted growth values. Prior to January 1, 2019 the benchmark was the 3000 Value Index. The Russell 3000 Value Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization with lower price-to-book ratios and lower forecasted growth values. The change provides a benchmark that better reflects the objective of the Composite.

†Information is based on a representative account and is supplemental to the GIPS Report. The information of the representative portfolio shown may differ from that of the composite and of the other accounts in the composite.
